

Akron Hub

Problem-Based Learning Workshop

What will educators participating in this session experience?

- 1 Examine Ohio and Common Core standards and how they can be met through PBL.
- 2 Design a PBL unit considering the needs and interests of their learners for classroom use.
- 3 Create PBL materials, documents and assessments for use with their PBL unit.
- 4 Understand what it means to be a learning coach in the PBL process.
- 5 Explore how PBL strategies increase collaboration, creativity and critical thinking.

*Provided by the Ohio STEM Learning Network (OSLN)-Akron Hub, this 3-day institute is designed to provide workshop attendees with an introduction to Problem-Based Learning (PBL) based on the model developed at the Illinois Mathematics and Science Academy® (IMSA) and adapted by National Inventors Hall of Fame® School ... Center for STEM Learning. In addition to being immersed in this PBL model, **educators will have the opportunity to design a PBL unit for use in their classroom.** Educators will also experience PBL from a learner's viewpoint as they engage in a problem and explore the learning process.*
